# Enterprise scalability

With RC-WebView, you can enjoy the convenience of using a standard internet browser to access your building controls from anywhere in the world at any anytime.

Configure a complete range of schedules using the Enterprise Schedule feature, from individual pieces of equipment to campus-wide or district events.

Program entire sequences of operations using the program editor, which makes it easy to write, edit, and share sequence of operations programs.

With secure user configuration, you can set up multiple users with Active Directory to simultaneously access graphics, trend logs, and runtime data; to change setpoints, schedules, and programs; and to acknowledge alarms.

All logons and changes are automatically recorded using the audit trail feature standard to RC-WebView.

Enjoy a subscription for 12 months of RC-WebView updates with your purchase, which you can conveniently renew without penalty after expiry.
