Windy City Wire

Peripheral partners

A renowned manufacturer and distributor of sensor technology for the HVAC industry. ACTI staff take pride in the products they build and believe customer service and performance are top priorities.

A global market leader in the development, production, and marketing of actuator solutions and control valves for HVAC systems.

Critical Environment Technologies is a leading manufacturer of commercial and light industrial leak detection applications. The company is dedicated to designing, developing, and servicing hazardous gas-detection systems for a wide range of uses.

Dwyer holds over 650 technical patents for instrumentation, and that number grows every year. The company takes great pride in the integrity of its employees, who are passionate about the work they do, the products they develop, and the industries they serve.

Since 1969, Functional Devices has been providing high-quality relay and power control products that are ideal for a variety of building control applications.

Windy City Wire is dedicated to developing solutions that generate significant results for customers. The company provides comprehensive cable management solutions that save integrators time on projects from concept to completion.

I&E Company has been in business for over 25 years and is a US manufacturer of a range of retail and industrial automation products, including all-in-one touchscreens, kiosks, digital signage displays, and touch LCDs for use in a variety of industrial and commercial applications.

iR-TEC is an ISO 9001/14001-certified company that has been designing and manufacturing sensors and control devices for building security and energy management since 1982.

Illumra is the largest supplier in North America of self-powered, battery-free, wireless lighting control and energy management systems and is a member of the EnOcean Alliance.
